

Farm Operations: Electrical Field Service Technician - Storage & Irrigation Maintenance - Equipment Operator

We're Hiring

We are currently looking for a multi-talented, all-purpose individual to fill the role of **Farm Operations Team Member** in Howard City, Michigan. Your role will change with the seasons and primarily include warehouse climate systems maintenance, center pivot irrigation programming and maintenance, electrical projects, operating modern farm equipment and sometimes, sweeping the floor. This role will be adjusted to align with your specific skills and experience. Advancement opportunities available.

Welcome to Sandyland Farms!

We are a diversified operation located in Central Michigan. Sandyland Farms grows potatoes, commercial and seed corn. We are a 4th generation company -- family owned and managed. We're committed to continuous improvement while providing excellent and rewarding jobs for our team members. We pride ourselves on being a forward-thinking operation.

This position is well suited for someone that:

- Is detail oriented
- Has experience with electrical devices like generators, transformers, motors, circuit breakers, etc.
- Has experience with electronic devices like diodes, transistors, microprocessors, logic gates, integrated circuits, etc.
- Has the ability to understand detailed schematics
- Has past success troubleshooting and repairing warehouse climate control systems and center pivot irrigation systems, pumps and VFD's
- Is comfortable using a laptop computer and computer skills
- Is excited by variety in your daily work
- Enjoys working outdoors and is comfortable with longer hours, especially during peak seasons. This is not an office or desk position.
- Is energetic and can produce quality results in a consistent and timely manner over extended time periods

Why Sandyland

Sandyland Farms provides competitive compensation packages, 100% paid health insurance, paid vacation time, retirement plan with company matching contributions, company vehicles and company housing (if needed). Compensation is highly determined by skills, prior work experience, attitude and future potential.

Daily Tasks / Expectations

- Perform repairs and maintenance on warehouse climate control systems
- Perform repairs and maintenance on center pivot irrigation systems
- Operate small tools, light-duty and heavy-duty equipment
- Operate modern farm equipment
- Maintain a sense of urgency, self-motivation and overall good work ethic while performing tasks in a safe manner.
- Receptive to training and performing functions in multiple areas (i.e. no task is “not my job”)
- Attend daily morning meetings
- Record and maintain accurate records
- Communicate effectively with supervisor and team members

Required Qualifications

- Valid driver’s license
- 3+ years accident-free experience operating equipment
- Electrical experience or knowledge of 3 phase, high voltage, low voltage (certification or licensing not required)
- Ability to climb steps and ladders to enter/exit equipment or gain access to repair facilities

Salary Expectations

- \$50,000 to \$80,000 annually (compensation is negotiable based on experience)
- 100% paid health insurance
- Paid vacation
- Other benefits depending on circumstances

To Apply

- No phone calls please.
- Email resume or request application: Jim Casler, CFO to jim @ SandylandFarms.com
- Only qualified candidates will be contacted.

NOTE: We do not accept resumes from recruiters, placement agencies or other suppliers that have not signed a formal agreement with us.
